

TLC Homecare Inc

4200 BROADWAY
OAKLAND, CALIFORNIA
(510) 458-8215

Serving Alameda and Contra Costa Counties

TLC Homecare is dedicated to helping patients achieve independence and assist with care transition to home. We employ an individualized, person-centered approach that enables individuals to take an active role in their wellness and overall lives. We provide care to patients in traditional and nontraditional home settings. Providing health care in the home ensures hospital stays are shorter and less frequent. TLC strives to serve clients who may have had difficulty accessing home health services through other agencies, such as clients who are un- or under-insured, socially unstable, have behavioral health challenges, or struggle with substance use disorders.

Our interdisciplinary team of RN, Physical Therapist and Occupational Therapist partner with patients to achieve goals for care and desired outcomes in collaboration with their physician. We equip our patients with knowledge, resources, and support to remain in their home.

What Makes us Unique?

Our interdisciplinary team of RN, Physical Therapist and Occupational Therapist partner with patients to achieve goals for care and desired outcomes in collaboration with their physician. We equip our patients with knowledge, resources, and support to remain in their home. We serve clients requiring home health services, regardless of their social or housing instability, or behavioral health needs.

We are partners with Cardea Health. If you have a patient who is experiencing homelessness and requires medical respite, we can help coordinate the referral

HHA services

Our Mission

TLC is dedicated to providing compassionate care for vulnerable populations. TLC works to improve access to home health services for clients who have historically been unable to receive needed care by providing high-touch, personalized services for every client.
